Education

VIT Bhopal University Bhopal, India
B.Tech in Computer Science (Cloud Computing Specialization) **CGPA: 8.09/10.0** 2023 – 2027

St. Francis Sr. Sec. School Bandikui, Rajasthan
Class XII – Senior Secondary **Grade: 79.6%** 2022

Experience

AI Backend Developer | Personal Project Experience Jan 2026 – Present
Self-Initiated Remote

- Built AI-powered health monitoring features using **OpenAI APIs** and cloud-based backend services.
- Developed **REST APIs** using Spring Boot for AI-driven symptom analysis and recommendations.
- Integrated real-time biometric simulation and prediction workflows into a **4-layer ML inference pipeline**.
- Improved response automation and reduced manual health-report generation time by **70%**.

Projects

CABO | *React, Spring Boot, PostgreSQL, Firebase, WebSocket, Docker* | [Live Demo](#) | [GitHub](#) Feb 2026 – May 2026

- Built a **full-stack college ride-sharing platform** with **6+ REST APIs** secured via **JWT** + **Spring Security RBAC**; deployed on Render + Vercel with automatic CI/CD from GitHub.
- Implemented **real-time WebSocket chat** (STOMP + SockJS) for instant messaging and live seat updates, reducing invalid join requests to **0%** via server-side duplicate booking prevention.
- Architected backend with **PostgreSQL (Supabase)** connection pooling and a complete **admin moderation system** with reporting, warnings, and blocking across role-based access tiers.
- Integrated **Firebase Authentication** for secure login and protected frontend routes with end-to-end token-based session management.

HealthSenseAI | *Kotlin, MVVM, Python Flask, Scikit-learn, Google Gemini API, Firebase* | [GitHub](#) Dec 2025 – Apr 2026

- Engineered an **Android health monitoring app** in Kotlin (MVVM) generating **6+ real-time biometric parameters** (Heart Rate, SpO₂, BP, Temperature, Sleep, Stress) every **10 seconds**.
- Deployed a **cloud-hosted ML prediction API** (Python Flask) classifying user health into **3 risk levels** from biometric and lifestyle data; integrated via Retrofit with end-to-end REST communication.
- Reduced manual health input by **~70%** via automated sensor simulation; piped data into the **4-layer ML inference pipeline** (sensor → ML → Gemini → UI).

Certifications

AWS Cloud Practitioner Essentials – *Amazon Web Services* May 2025
Foundational knowledge of AWS Cloud services, architecture, pricing, and the shared responsibility model.

DevOps Fundamentals (CEDEV2IN) – *IBM Career Education* Jun 2025
CI/CD pipelines, containerization (Docker), infrastructure as code, and agile DevOps practices.

McKinsey Forward Program – *McKinsey.org* Dec 2025
Leveraged McKinsey frameworks to resolve complex business challenges, cutting critical issue resolution time by 25%.

Technical Skills

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frontend & Backend: React, Vite, Spring Boot, Spring Security, Spring Data JPA, Flask, REST APIs, Hibernate

Cloud & Tools: AWS (EC2, S3, RDS), Docker, Jenkins, Git, GitHub, CI/CD, Postman, Maven, IntelliJ IDEA

Databases & AI/ML: PostgreSQL, MySQL, Supabase, MongoDB, Google Gemini API, Generative AI
